State and Federal Health Care Government Relations

Our firm represents the interests of our health care clients in connection with both state and federal legislation. We have more than 50 lawyers with legislative experience at one or more levels of state and federal government, many of whom have testified before committees of Congress or the Ohio General Assembly. We also offer health care clients full service representation before city councils, county commissioners, and township trustees. We help shape legislation by drafting bills, amendments, and testimony for sponsors and witnesses. Our lawyers have extensive knowledge of the legislative process, which they use to develop strategies to effectively support, oppose, or amend specific legislation of interest to our clients.
