Underground Storage Tanks

Our attorneys counsel clients on Underground Storage Tank (UST) regulations and compliance issues with an eye toward avoiding enforcement. We regularly assist clients in settling or prosecuting claims for fund reimbursement and work with Ohio's Bureau of Underground Storage Tank Regulations personnel to develop and implement cost-effective remediation strategies. Our lawyers also defend clients in civil actions referred to the Ohio Attorney General's office for enforcement. We counsel clients in the purchase and sale of former UST sites. We were actively involved in the development of Ohio's regulations for underground storage tank closure and corrective action and in the creation of a state UST insurance fund.
