

## Commercial and Residential Real Estate

We advise financial institutions, insurance companies, corporations, joint ventures, partnerships, limited liability companies, developers, and individuals on a complete range of sophisticated real estate matters. Our attorneys have considerable experience with developing, buying, selling, leasing, and financing commercial and residential property real estate transactions. Our real estate attorneys also work closely with attorneys in other practice areas to thoroughly analyze deal and transaction structuring issues, environmental considerations, and tax implications.

Our firm has long been a recognized leader in providing legal services to the Ohio real estate industry. For example, our lawyers played key roles in drafting the Ohio limited partnership, limited liability company, condominium, and open-end mortgage laws. In addition, we counsel our real estate clients in a variety of intellectual property matters.
