

## Superfund

We represent clients in all aspects of the Superfund/CERCLA liability process, including negotiation of administrative orders and consent decrees, defense of United States EPA cost recovery actions, and participation in multi-party cost recovery actions. Our attorneys have a national practice and have served on steering and coordinating committees in Superfund cases in California, Delaware, Indiana, Louisiana, New Jersey, Ohio, Pennsylvania, and South Carolina. We have litigated matters involving public entities such as the United States Department of Justice, the Ohio Attorney General, and state agencies. We have also brought and defended private recovery actions and contribution claims under CERCLA and tort and contract law that seek to secure reimbursement for costs incurred in remediating historic conditions.
