

Legislation and Policy

Our attorneys routinely monitor federal, state and local legislation affecting state and local tax matters and advise our clients on the potential impact of such legislation. Our tax lawyers also work with our government relations attorneys to develop and advocate for legislative solutions to the particular state and local tax needs of our clients.

We also work with legislative and administrative officials in developing and drafting general tax legislation and administrative rules. Our attorneys often are called upon to provide proponent or opponent testimony related to pending legislation.
