

Reimbursement, Contract, and Fraud and Abuse Litigation

Our lawyers have extensive experience in litigating health care reimbursement and contract cases, across a broad spectrum of payor arrangements and business relationships. We regularly represent health care providers before state and federal agencies and before state and federal courts on a wide range of reimbursement issues, including complex Medicaid and Medicare matters and physician referral arrangements, among others. We also have significant experience in defending health care fraud and abuse cases under both state and federal law.

In addition, we have significant experience in litigating systemic contract issues between private providers and governmental entities. Our firm is a recognized leader in the field of contracts and reimbursement issues for behavioral health (mental health and drug and alcohol and drug treatment and prevention), Mental Retardation and Developmental Disabilities (MR/DD), and child welfare services, and in the field of Medicaid reimbursement and contract litigation.
